

White Paper: S.McBank Project

Introduction

The Sterling McBank token isn't just another coin — it's a challenge to the entire crypto world. Built with precision and a vision for the future, \$MCBK blends cutting-edge blockchain mechanics with a deflationary system that rewards patience and loyalty. Every transaction burns a piece of history, making the remaining tokens rarer and more desirable.

In its early days, access to \$MCBK is intentionally limited — not to restrict, but to protect its value and give every holder a fair start. This is more than an investment; it's a ticket into an evolving ecosystem that merges gaming, collectibles, and real-world rewards in ways the market hasn't seen before.

We are here to create not just hype, but a legacy. By the time the locks come off, those who believed from the start will hold more than tokens — they will hold the keys to a community-driven financial movement. And in that moment, the world will see why \$MCBK was built different from the very beginning.

The \$MCBK token is built with:

- A deflationary model (burning during transactions);
- Vesting mechanics for fair distribution;
- Anti-bot measures and transaction protection.

Important Warning: Participation in the project is available only to adult users (18+). Upon first launch, the application requests age confirmation.

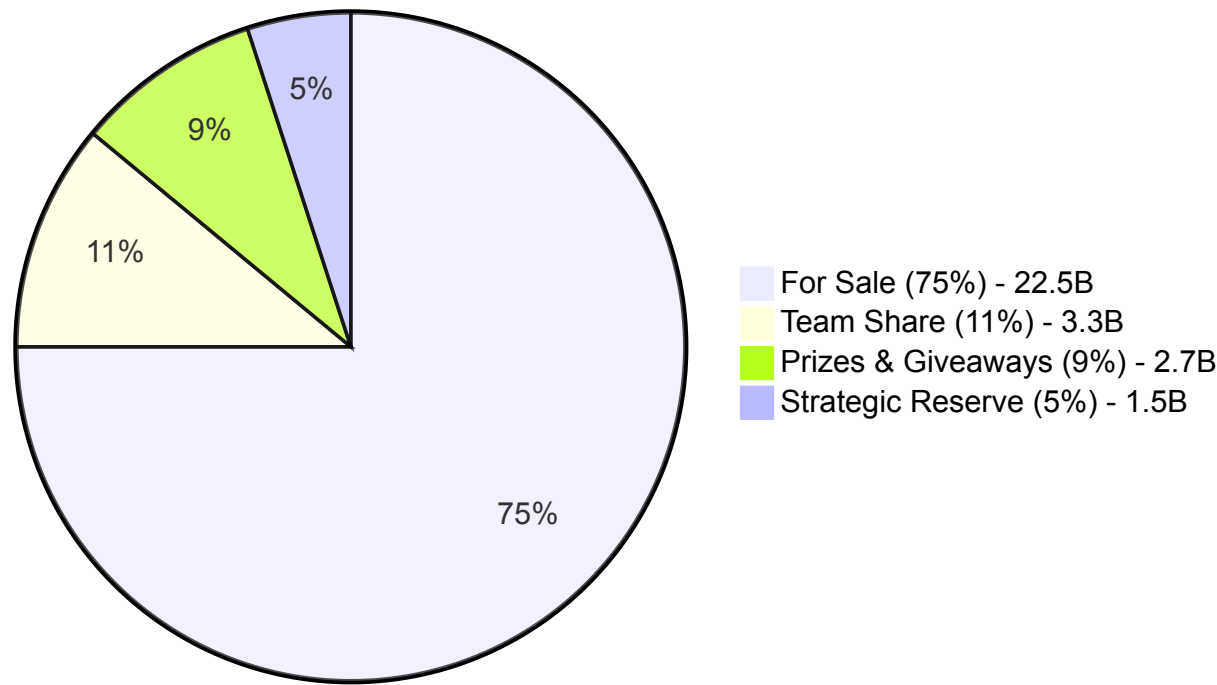

Token Contract

- Contract address: [EQB2NhgtcLC3_3nuDUiqAqrKb2AVGBRFWVL8DjaYov6jvFK8](#)
- Network: TON Blockchain

Tokenomics (Vesting)

Total Emission and Distribution

\$MCBK: Distribution (30,000,000,000)

- **Total number of issued coins:** 30,000,000,000 (30 billion MKBK).
- **For sale:** 75% (22.5 billion coins).
- **Prizes and giveaways:** 9% (2.7 billion coins).
- **Strategic reserve:** 5% (1.5 billion coins).
- **Team share:** 11% (3.3 billion coins).

Burning Mechanics

- In all operations (transactions) with the coin (purchase, sale, transfer, exchange), 0.3% of the coins from the transfer amount are irreversibly burned.
- Burning stops when the remaining total number of coins reaches 10,000,000,000 (10 billion).

Purchase Limits

- One account can buy a maximum of 0.1% of the total emission (30,000,000 \$MCBK coins) before day 106.
- From day 106, the limit is removed.

Full Lock Period

- **Duration:** 105 days (from day 0 to day 105).
- **User Capabilities:**
 - Only coin purchases.
 - Sales are prohibited.
- **Exception for Founders/Team:** Sales, transactions, and coin transfers to other addresses are available.

Launch of Trading

- Sales, trading, transactions, and exchanges are allowed starting from day 106.

Coin Unlocking Schedule

Unlocking begins on day 106 and ends by day 180:

\$MCBK Unlock Schedule (Total 100%)
